EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeremy Welch on August 15, 2006.

The application has been amended as follows:

(i) In claim 1:

(a) line 23, replace the phrase "both catalyst components are present" with --the first catalyst is present in at least one reaction zone and second catalysts is present --; and

(b) in the last line, replace "reaction zone" with --of the first and the second reaction zones--.

(ii) Cancel claim 57.

2. The following is an examiner's statement of reasons for allowance:

The instant claims are directed to a multistage continuous process for preparation of a branched olefin polymer in presence of two different catalysts in two reaction zones, where the contents of the first polymerization reaction zone are transferred to the second polymerization reaction zone directly. Weng et al. (US 6,660,809) teaches a multistage process wherein a macromer prepared in the first reactor is separated from the reaction media and then feeds to the second reactor to be copolymerized with olefin monomer in the presence a metallocene catalyst to provide a

branch olefin polymer. Because Weng does not teach or reasonably suggest feed the contents from the first polymerization zone directly to the second polymerization zone, the rejection over Weng of the record is withdrawn. Therefore, the instant claims are in the condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
